Insurance: Mathematics and Economics 8 (1989) 331
North-Holland

Author Index Volume 8 (1989)

(The issue number is given in parentheses)

Bauwelinckx, T., see **M.J. Goovaerts** (1) 23– 29
Boogaert, P. and **J. Haezendonck**, Delay in claim settlement (4) 321–330
Butler, Richard J. and **John D. Worrall**, Estimating 'hedonic' distributions using polynomials (4) 303–308
Centeno, Lourdes, The Bühlmann–Straub Model with the premium calculated according to the variance principle (1) 3– 10
Chang, Jack, S.K., C.S. Cheung and **I. Krinsky**, On the derivation of reinsurance premiums (2) 137–144
Cheung, C.S., see **J.S.K. Chang** (2) 137–144
Cho, Dongsae, On optimum loss control: The case of Poisson distributed losses (4) 309–313
Crépeau, C., see **M. Gendron** (3) 251–258
Currie, I.D., see **K.J. Stroiński** (1) 35– 46
De Vylder, F., Compound and mixed distributions (1) 57– 62
Delbaen, F. and **J. Haezendonck**, A martingale approach to premium calculation principles in an arbitrage free market (4) 269–277
Dickson, David C.M., Recursive calculation of the probability and severity of ruin (2) 145–148
Dufresne, Daniel, Stability of pension systems when rates of return are random (1) 71– 76
Dufresne, Daniel, Weak convergence of random growth processes with applications to insurance (3) 187–201
Fiocca, Mariateresa and **John D. Hey**, The demand for Italian health insurance (2) 105–118
Garrido, José, Stochastic differential equations for compounded risk reserves (3) 165–173
Gendron, Michel and **Hélène Crépeau**, On the computation of the aggregate claim distribution when individual claims are Inverse Gaussian (3) 251–258
Goovaerts, M.J., see **A. Steenackers** (1) 31– 34
Goovaerts, M.J., see **A.E. van Heerwaarden** (1) 11– 17
Goovaerts, M.J., see **A.E. van Heerwaarden** (4) 261–267
Goovaerts, M.J., see **R. Kaas** (1) 19– 21
Goovaerts, M.J., T. Bauwelinckx and **C. Stoop**, The practical application of credibility theory (1) 23– 29
Haezendonck, J., see **F. Delbaen** (4) 269–277
Haezendonck, J., see **P. Boogaert** (4) 321–330
Heijnen, Bart, Perturbation calculus in risk theory: Application to chains and trees of reinsurance (1) 97–104
Heilmann, Wolf-Rüdiger, Decision theoretic foundations of credibility theory (1) 77– 95
Hey, J.D., see **M. Fiocca** (2) 105–118
Holland, David M., Observations on the HIV epidemic and managing uncertainty in insurance (3) 211–232
Jewell, William S., A general framework for credibility prediction of multidimensional first and second moments (2) 127–136
Kaas, R., see **A.E. van Heerwaarden** (1) 11– 17
Kaas, R., see **A.E. van Heerwaarden** (4) 261–267
Kaas, R., A.E. van Heerwaarden and **M.J. Goovaerts**, Combining Panjer's recursion with convolution (1) 19– 21
Klugman, Stuart, A., Bayesian modelling of mortality catastrophes (3) 159–164
Klüppelberg, Claudia, Estimation of ruin probabilities by means of hazard rates (4) 279–285
Krinsky, I., see **J.S.K. Chang** (2) 137–144
Michel, R., Representation of a time-discrete probability of eventual ruin (2) 149–152
Nesbitt, Cecil J., Further reflections on actuarial recognition of nuclear holocaust hazard (3) 233–242
Page, Dominique, Insurance-investment: Diffusion analysis (4) 287–302
Panjer, Harry, H., AIDS: Exponential vs. polynomial growth models (3) 203–209
Panjer, Harry H. and **Gordon E. Willmot**, Guest editors' introduction (3) 157
Pressacco, Flavio, A managerial approach to risk theory: Some suggestions from the theory of financial decisions (1) 47– 56
Schmidt, Klaus D., Positive homogeneity and multiplicativity of premium principles on positive risks (4) 315–319
Shiu, Elias S.W., Ruin probability by operational calculus (3) 243–249
Steenackers, A. and **M.J. Goovaerts**, A credit scoring model for personal loans (1) 31– 34
Stoop, C., see **M.J. Goovaerts** (1) 23– 29
Stroiński, Krzysztof J. and **Iain D. Currie**, Selection of variables for automobile insurance rating (1) 35– 46
Sundt, Bjørn, Bonus hunger and credibility estimators with geometric weights (2) 119–126
Van Heerwaarden, A.E., see **R. Kaas** (1) 19– 21
Van Heerwaarden, A.E., R. Kaas and **M.J. Goovaerts**, Optimal reinsurance in relation to ordering of risks (1) 11– 17
Van Heerwaarden, A.E., R. Kaas and **M.J. Goovaerts**, Properties of the Esscher premium calculation principle (4) 261–267
Venter, G., A three-way credibility approach to loss reserving (1) 63– 69
Willmot, Gordon, E., Limiting tail behaviour of some discrete compound distributions (3) 175–185
Willmot, G.E., see **H.H. Panjer** (3) 157
Worrall, J.D., see **R.J. Butler** (4) 303–308
